

Dear reader,

As you know, Lapauw started producing industrial laundry equipment in the middle of the last century. We have a very long history of innovations that have shaped the laundry industry as it is today. For instance, if Lapauw would not have invented the gas heated ironer in the nineties, today, steam would maybe still be the only used heating method for ironing.

We are lucky to have very loyal personnel and all of them have helped Lapauw to become what it is today. Staff with multiple decades of experience with Lapauw are no exceptions. Last week, someone of our staff retired after selling lapauw equipment for 38 years!

Lapauw is committed to its baseline "beyond innovation" and will continue to bring added value to its customers, delivering innovative total solutions with a low total cost of ownership.

Our new total garment solution is already available and we will launch other major innovations at Texcare International in Frankfurt next year.

Some of these will already be shown at our Open House Days in December this year.

I look forward to meeting you there.

With kind regards,

Steven Renders
CEO

Total Garment Solutions.

Lapauw has extended its Garment Solutions program with a garment handling system and garment folders, next to our well-known Hot Stream tunnel finisher.

Lapauw offers flexible solutions up to 2000 items/hour, with easy maintenance and maximal control and communication.

Lapauw Laundry Planning.

Lapauw has created a helpful aid to determine the sizing of equipment in a laundry.

If you want to download the Lapauw Laundry Planning guide, please send an e-mail to marketing@lapauw.be. You'll receive the download link as soon as possible.

Lapauw Open House Days.

Lapauw is proud to invite you to our Open House Days on the 3th and 4th of December 2015.

We will be showing our complete range of machines in operation, provide factory tours and much more.

For more information and subscription, contact us at opendays@lapauw.be!

Dealer in the spotlight: Warutec.

Austria is one of those markets where efficiency and ecology are key words. In other words, a market where Lapauw equipment has its place. In this market, we rely on Warutec to promote and service our machines, and with reason.

Warutec was established 20 years ago by Michael Holzmüller, the current CEO and owner, and has since then built itself a reputation as a total solution provider, specialized in energy efficiency. A speciality for which Warutec already received recognition from local governments on several projects, such as the Brunhofer Laundry, where Warutec handled the complete laundry layout with a Lapauw gas heated ironer. Brunhofer is known as one of the most efficient laundries in Austria.

Lapauw Financing Solutions

Like many other companies, laundries are looking to get their investments financed. Needless to say, the financial turmoil that hit us since 2008, hasn't made this task any easier.

Therefore, Lapauw now offers its customers a way to get their Lapauw projects financed. A program

where we work together with the Belgian Export Credit Agency (ECA).

Texcare Asia 2015.

Just like 2 years ago, Lapauw will be participating at the Texcare exhibition in Shanghai. We look forward to welcome you all at our booth and to show you our 2 roll Ø 900 ironer, folder and 120 kg washer extractor.

If you should need any assistance or have any questions concerning the exhibition, don't hesitate to contact us at info@lapauw.be.

Interclean CEE 2015.

International Conference InterClean, organized by Czech Laundry and Drycleaners Association, has expanded this year by the summit CEE-TEX platform coordinated by CINET. The entire program is spread over three days - from 29th to 31st October 2015. The conference is traditionally held in Hotel Voronez, Brno, Czech Republic.

Lapauw CEE is proud to be a General partner of InterClean Conference and would like to invite its customers to visit the Lapauw booth and attend our company presentation about innovative trends in laundry equipment!

Beyond Innovation.

Sheets or duvets, big or small, Lapauw folds them all!

Our Lapauw Unifold is, like most other folders, equipped with primary fold performed by an air blast. But we make advantage in the cross folding.

Instead of using an air blast system that has poor quality finishing for cross folding or a complex system with reversing belts, we simply use 3 knife folds in the cross section.
