

Dear reader,

Many customers visited our factory a few weeks ago. It was very motivating to see their enthusiasm for and the interest in our extended product range.

It shows that the move to total solutions is the right answer to the needs and expectations of our customers.

Within these solutions, we are of course further optimizing our machines. The investments in R&D over the past years are now becoming more and more visible. We have for instance recently presented a dryer which is specifically designed for cleanrooms.

More innovations will be shown at Texcare next year: the new generation of high capacity gas heated ironers and the use of the Lapauw technology in a newly developed range of small diameter ironers.

2015 has gone by at a very high pace and with the plans we have for 2016, I expect the same for 2016.

The whole Lapauw team wishes you and your family a healthy and innovative 2016.

Steven Renders,
CEO.

Season's Greetings 2016

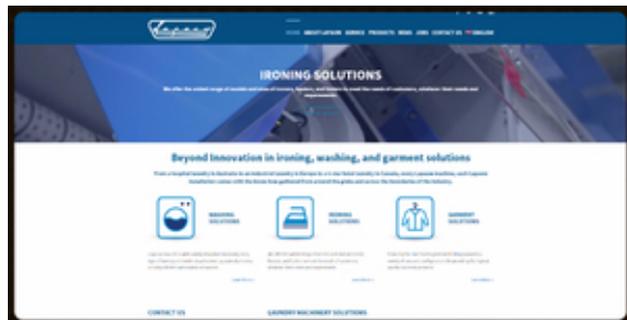

New Lapauw website

We're very excited to announce the launch of our newly designed website.

The website contains all information about Lapauw and all of our products.

The new website is based on our new corporate image and includes many improvements, such as: faster interface, more visuals and easier navigation. We've

also made sure that the new platform is accessible on each device (computer, tablet, mobile phone). This way, our website is designed to be very user friendly.

Feel free to visit our new online platform at www.lapauw.be.

New team members for Lapauw USA

We are excited to inform you that our subsidiary in North America, Lapauw USA, recently announced the appointment of two new team members: Ms. Amanda Lobb and Mr. Hayward Lindsey.

Amanda is our new Sales Manager, and she brings many years of experience in the laundry industry. Our new Director of Technical Services, Hayward Lindsey, has spent his entire career in the laundry industry in roles that include engineering, maintenance, production, operations and management.

Mr. Hayward Lindsey - Ms. Amanda Lobb - Mr. David Bernstein

Medistream Cleanroom solutions

Meet the Medistream, our new dryer. But it's not just a dryer, as this dryer is the world's first real cleanroom dryer and the next logical step in the Lapauw strategy of becoming a total solutions provider.

Large diameter single roll ironers

When looking at single roll ironers, laundries tend to look for small roll diameters, instead of larger diameters. Especially when they have to deal with delicate linen.

Projects with party rental companies in the US that we did this year, shed another light on this convention.

Dealer in the spotlight: TMC - Vietnam

TMC is one of Lapauw's newest dealers and for sure more than worthwhile to mention. In the past 2 years, TMC realized to become one of the most important dealers of Lapauw and is successful in setting Lapauw as a standard in Vietnam.

Recent projects, realized by TMC, are Lotte Hotel Hanoi, Novotel Danang, Ba Na Hills Danang, Premier Village Danang Resort (Accor) and many more. Beside supplying these 5 star hotels with Lapauw ironers and folders, TMC also has its own laundry in Hanoi, equipped with Lapauw equipment.

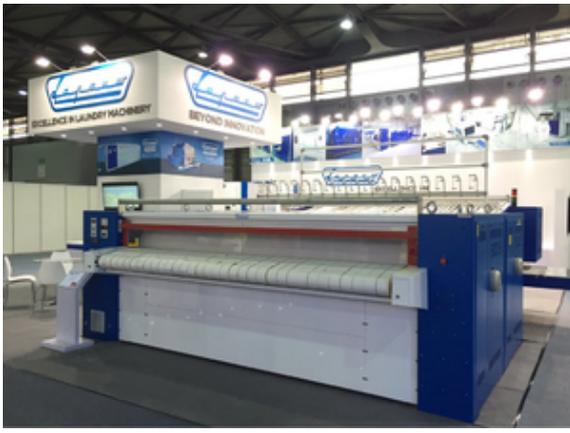

This said, we would like to thank all of our friends of TMC for their efforts. We look forward to continue and further expand the business in Vietnam.

Texcare Asia

Lapauw is thankful to all the visitors at the Texcare Asia show held last month in Shanghai - China.

The show was very successful for us and it was a great start for us to promote our Chinese assembled machines to our Chinese customers.

Lapauw Dealer days and Open House days

Immediately after the Texcare exhibition in Shanghai, Lapauw organized its dealer training days and open house days. Dealers from over 20 different countries visited Lapauw during 3 days for both sales and maintenance trainings.

Afterwards, on Thursday and Friday, we welcomed many clients from all over the world who were interested to see our latest innovations on washing, ironing and garment solutions.

Beyond Innovation: Steam heated chests

As you know, Lapauw is the only manufacturer that adopts a different design for its gas heated, flexible chests and steam heated, flexible chests. And with good reason!

The design of the flexible chest with 2 thin plates is widely adopted in the laundry industry: The thinness of the plates makes the chest flexible, while the heating medium runs through the cavities between the plates. This works very well with thermal oil systems, like gas or electric heated ironers. But when it comes to steam heating, this design faces some challenges, which could even lead to damage. The Lapauw hinged chest design with 2 thick plates, offers a solution to these issues.
