

Dear reader,

The 2016 Texcare show in Frankfurt has been a milestone for our company. For the first time, Lapauw has shown total solutions for ironing, garment finishing and cleanroom operations.

The enthusiasm about the new products motivates our team to work even harder to fully satisfy our customers and present them the best possible solutions, now and in the future.

I must thank the many visitors to our booth with whom we have had very interesting discussions about how Lapauw equipment can bring added value to their laundries at the lowest total cost of ownership.

In this newsletter, you can read all about Texcare, our new products and our revolutionary new oil flow concept, which is now introduced in our completely redesigned high capacity gas heated ironer.

As we are always looking for possible improvements, don't forget to send us your comments on our newsletter at marketing@lapauw.be.

Best regards,

Steven Renders
CEO

Texcare Frankfurt 2016

As mentioned above, the 2016 Texcare show in Frankfurt, Germany, has been a milestone for Lapauw.

As the pioneer, we were proud to present our completely new reinvented gas heated ironer. Next to the **IRONMAX**, visitors were also exposed to our new range of **IRONPRO** machines, which focuses on the smaller capacity OPL market.

Lapauw also displayed its total garment finishing solutions, and the Lapauw Medistream, the first ever cleanroom dryer, which was exhibited next to the Mediwave. Together, both machines are fully committed to the cleanroom standards of today.

IRONPRO, Lapauw quality for small ironers

With the **IRONPRO** Lapauw expands its ironing range to the OPL laundries and small capacity ironing lines that require a high quality finish.

The **IRONPRO** will be available in 500 - 600 and 800 mm diameter.

IRONMAX, Gas heated ironer reinvented

With the **IRONMAX**, Lapauw has redefined the standards for gas heated ironers. New and innovative technologies give the answer to today's and tomorrow's demands for increased productivity and efficiency.

Number one features of the **IRONMAX** are the large bridges and innovative chest design, the parallel oil flow system and the typical Lapauw individual springs.

Unifold restyled

As Lapauw continues with its total solutions program, the Unifold has received a mayor update.

With the first update, the 1-lane - 2-lane cross folding unit has been updated allowing the machine to operate in 1 and 2 lanes at speeds exceeding 50 m/min.

Also, the Unifold control unit has been updated to the Siemens control system, offering intuitive controls and expanded diagnostics and monitoring.

And last but not least, we've put our focus maintaining the lowest total cost of ownership and ease of maintenance of the machine: a folder is a machine that has many possible configurations (among them for example the stacker and cross fold exit to the left or to the right...). This poses a serious challenge in the engineering and service departments. The restyled Unifold is subdivided in modules, which renders standardization of the spare parts possible and facilitates maintenance.

Meet Nicolas De Lanoy - Lapauw France

We gladly present Nicolas De Lanoy, who joined Lapauw France and will be responsible for the sales of the Lapauw machines in the north and north-east of France.

Nicolas combines a vast technical know-how and more than 15 years of experience in the field of machinery for the textile and laundry industry. Having started as maintenance technician with a textile company, Nicolas joined the laundry sector in 2005 as a service

engineer. He was responsible for the installation and service of the finishing equipment. So he packs a lot of technical know-how on feeders, folders, ironers and tunnel finishers.

Nicolas takes over the sales for the north and north-east region of France from Gilles Pagerie, who served us well over more than 10 years and is now enjoying a well-deserved retirement.

We wish Nicolas a successful career with Lapauw France!

Open House Lapauw USA at Rentals Unlimited

More than three dozen Special Event and Party Rental professionals from the USA attended an Open House and Education Day in May, hosted by Lapauw USA, Rentals Unlimited and PPC Events at the Rentals Unlimited location in Stoughton, Massachusetts.

It was an incredibly successful event for Lapauw, allowing us to not only demonstrate the superior capabilities and value of the Lapauw Special Event Ironing Solution, but also our commitment to helping our customers achieve success and efficiency in all aspects of their operations.

Dealer in the Spotlight: Newmatic

Since 2015, Newmatic is Lapauw's Dubai based dealer for the Middle East region, except for the Kingdom of Saudi Arabia.

Newmatic was founded in 1993 and has its head office in Dubai. They recently moved to Jebel Ali free zone where they renewed a complete complex of offices and warehouses. Newmatic has a very strong reputation in service towards the customers and is known as a reliable partner for the purchase of new equipment.

These were the exact reasons why Lapauw decided to start cooperating with Newmatic to strengthen our position in the market and to be prepared for the many coming projects in the next years in these countries.

We would like to thank Newmatic for the efforts made and we look forward to expand our business together in the next coming years.

Beyond Innovation: Parallel Oil Flow

As mentioned above, the **IRONMAX** is the first ironer on the market that is equipped with a parallel oil flow system.

Read here 3 reasons why the parallel flow system makes the **IRONMAX** the most powerful gas heated ironer in the industry.

Summer Break

July and August are as usual the months where several companies close for their summer break. The production unit at Lapauw will be closed from the 18th of July till the 16th of August 2016.

Of course, during this period, our after sales team is ready to assist you with all your service needs. The service department can be reached from Monday till Friday from 07:45AM till 04:30PM on their direct number **0032 56 35 43 15** or on the central number of Lapauw 0032 56 35 42 95. The service department can also be contacted by email on: aftersales@lapauw.be

We wish you all pleasant summer holidays!
